OBJECTIVE

The short term

I would like to work in a stable company, with high professionalism, I would like to learn more specialized knowledge of new technologies to improve Frontend skills and help to create high quality products.

The long term

I would like to work for an organization which provides me the opportunity to improve my skills and knowledge to grow along with the organization objective of the company.

EXPERIENCE

Remote job | 01/2020 – present

- Get Frontend tasks and provide the estimation.
- Discussed with client and team to clarify the requirements.
- Based on designing and implementing web applications by using React.js.
- Developed and implemented responsive UI components using React concepts.
- Developed and maintained Central State Management through Context API, Redux store, React Router…
- Handle fetching, catching, and updating asynchronous data with React Query.
- Integrated modern UI/UX designs into enterprise web applications, increasing user engagement level.
- Optimized web pages for maximum speed and scalability, improved performance, prevented wasted re-render, optimized Bundle size with code splitting.
- Created the Responsive Web
- Fix bugs and improve the quality of the application.
- The projects I had worked on:
  https://admin.bookingmonkey.com/
- This is an admin tool to help managed the back-office system as change status of reservations, create/update/delete customers, ….
- This tool built based on using react, redux, and redux-thunk
- My responsibly is to develop some React components and integrate with some API had created by back-end team.
- I had completed some Udemy Courses for self-improvement:
  https://udemy.com/course/the-ultimate-react-course/learn/lecture/38038066#overview

Sunbytes | 08/2019 – 10/2020
- Collaborate with cross-functional teams to design, develop, and deploy applications based on the WordPress framework.
- Use Bedrock for developing web applications and Sage to develop custom themes.
- Working with agile style development (daily meeting, task estimation, clarify requirements …).
- Working directly with the Design team in the Netherlands on chat, task discussion.
- Created the Responsive Web, checked the perfect pixel.
- Some project I worked on:
    - https://www.typetuin.nl/
    - https://methavensteder.nl/
    - https://www.sompotraveljoy.com/th/

Income Saigon | 01/2018 – 7/2019
- Working with Scrum Sprint on Jira.
- Working with BA, Alpha team to create some wireframes on the Figma website, after that I will present in front of the team and receive feedback, finalizing I have the main responsibility to create some HTML pages based on this wireframe.
- Decide and estimate time to cut HTML pages / or receive tasks from the PM.
- Use Bitbucket to manage the source code of the project. Support and edit the layout in the process of working.
- Created the Responsive Web, checked the perfect pixel.

SKILLS
- Experienced with JavaScript and jQuery, React JS
- Experienced with library React JS, Redux(Redux@toolkit), Redux-thunk, Context-API, React Router, React Query…
- Experience working with RESTful API.
- Optimized web pages for maximum speed and scalability, improved performance, prevented wasted re-render, optimized Bundle size with code splitting.
- Basic knowledge about Node Package Manager tools such as npm, yarn.
